REAL ESTATE FOR SALE.

REAL ESTATE FOR SALE.

Let no tongue or argument confuse you as to what's going to make New York the largest city of the world.

Go, see for yourself! Arrange to reach the 34th Street Ferry soon as you can, secure free tickets and catch an early train. Come, behold the most wonderful evolution in suburban construction that this mighty metropolis will ever witness.

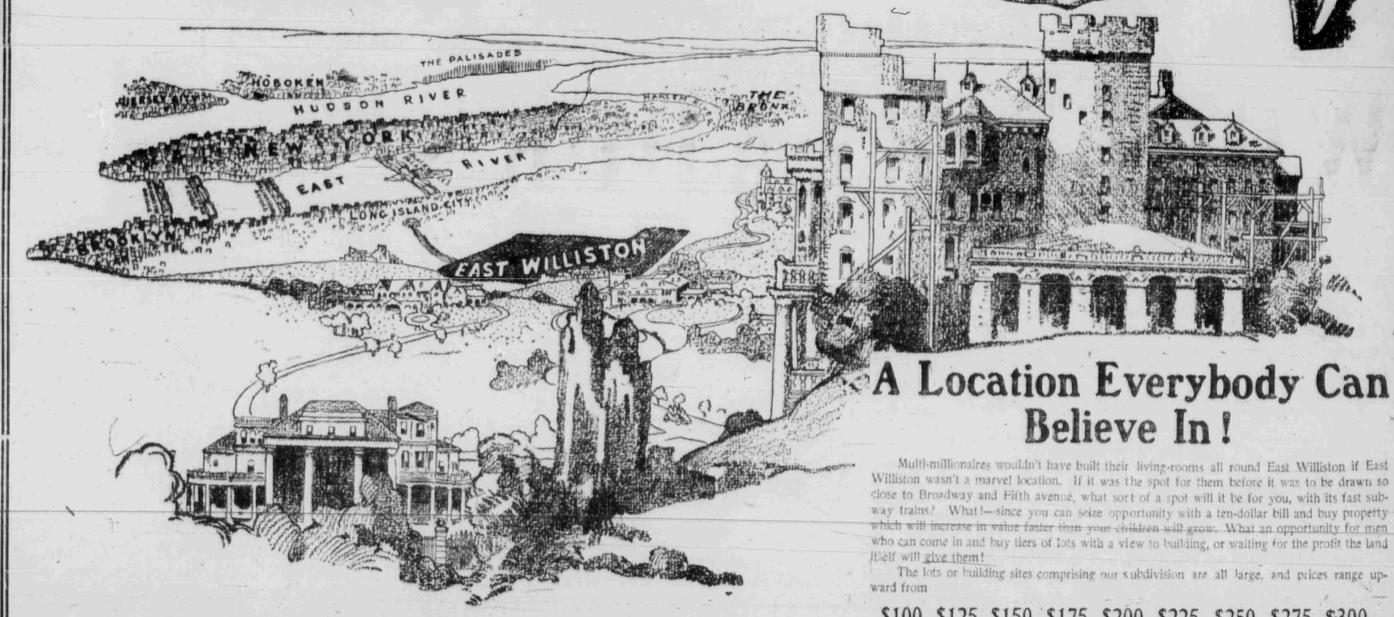

New York's Bang-up New 30-Minute Suburb

WITH ITS KINGS OF FINANCE PEERING UPON IT FROM THE GILDED LATTICES OF THEIR PALACE WINDOWS.

Real estate that had quality, neighborhood and a splendid future fixed even before the great East River subways were ever dreamed of! But real estate which now, since it is to be connected by a flash of the watch with teeming Broadway and its irresistible glare, has been made ready for a new and grander future, opening to the man or woman who has a ten-dollar bill the biggest moneymaking opportunity that any human being ever heard of.

We want you to realize that real estate values here are bound to go sky-high soon as the GREAT THIRD-RAIL SUBWAY trains take the place of the slower surface trains which are at present running to our property by way of the 34th Street Ferry and Long Island Depot. We want you to ponder on what 30 minutes from the centre of uptown to this grand new suburb will mean not only to the people who wish to tear away from the high rents of the unsatisfactory apartments, but also to the people who are ambitious to have their earnings and bank accounts increase simultaneously with the fast-growing wealth of the wonderful American metric offs while it is bursting its bands in its mad efforts to get more rooth for its population.

IT SKIRTS THE RIDGE OF THE GREAT CASTLES AND PALACES

Remarkable Era at Hand!

Think of the tremendous money-making era that's coming with the inevitable multiplication of the real estate value of all this fine high part of the Island, to which trains will keep shooting out every few minutes from the very centre of Uptown, going underground from the great Pennsylvania Depot on 34th Street and Seventh Avenue to the East River, then under the East River, Long Island City and miles farther underground.

While you're thus studying the conditions which are going to make many a poor man rich, remember that there are precedents for what's now happening. Men with scarce ten dollars to their names grew up with Chicago and the Western cities at the time Horace Greeley gave his memorable advice: "Go West, young man."

The West got its impetus from the new-found fields of mineral and agriculture. New York is getting her impetus from the new-found fields of international commerce, which, one of our distinguished ambassadors has said, will in less than ten years put it beyond London and every city on the globe in number of people and in number of dollars.

So the cry now is "Come East, young man!" Come to East Williston, within the gleam of 'millionaires' ridge." where the towering wealth of improvements will be made. Within the glow of the castles and palaces of A. Cass Canfield, Clarence Mackay, Robert Bacon, John S. Phipps, W. G. Park, Foxhall Keene, W. L. Stowe, the William C. Whitney estate and other factors prominent on the honor roll of society and of finance.
